企业历程

Corporate History

2013：工厂整体自上海搬迁至浙江常山。

2013: The factory as a whole was relocated from Shanghai to Changshan, Zhejiang.

2015：在常山育苗栽种香柚(YUZU),用 3 年完成育苗 60 万株，为种植万亩香柚奠定种苗基础。

2015: YUZU seedlings were cultivated and planted in Changshan. Over the course of three years, 600,000 seedlings were raised, laying the foundation for planting 10,000 mu of YUZU.

2016：新三板挂牌上市，证券代码 839742。

2016: Listed on the National Equities Exchange and Quotations (NEEQ), stock code: 839742.

2017：柚子酵素、柚子山药汁系列产品陆续推出、测试市场。

2017: A series of products, including YUZU enzyme and YUZU yam juice, were launched successively for market testing.

2019：被评为衢州市农业龙头企业，“双柚合璧，争创百亿”的发展战略获得县委县政府高度重视和大力支持。完成香柚定植超 5000 亩，首届香柚采摘节成功举办，香柚迎来首次收获。

2019: The company was recognized as a leading agricultural enterprise in Quzhou. Its development strategy of “Integrating the Two Pomelos and Striving for a RMB 10 Billion Industry” received strong attention and support from the county Party committee and government. More than 5,000 mu of YUZU were transplanted and established, the first YUZU Picking Festival was successfully held, and YUZU saw its first harvest.

2020：香柚产业园被列入省级第二批农村产业融合发展示范园区。常山县香柚产业园在“衢州有礼/诗画风光带/一县一园”评比中荣获第一名，并获 500 万元奖励。第二轮(2 万亩香柚基地)扩种启动香柚苗木扩繁，当年完成容器袋育苗 15 万袋。

2020: The YUZU Industrial Park was included in the second batch of provincial demonstration parks for the integrated development of rural industries. Changshan YUZU Industrial Park won first place in the “Quzhou with Courtesy / Poetic and Picturesque Scenic Belt / One County, One Park” evaluation and received an award of RMB 5 million. The second round of expansion for the 20,000-mu YUZU base was launched, together with seedling propagation, and 150,000 container-bag seedlings were completed that year.

2021：柚香谷管理中心基地民宿项目竣工，三产融合初见成效。引进国内先进的鲜果加工(榨汁、精油提取)生产线。明星产品“双柚汁”上市，迅速引爆市场，热销华东。

2021: The homestay project at the YUZU Valley Management Center base was completed, marking the initial success of integrated development across the primary, secondary, and tertiary industries. The company introduced domestically advanced fresh fruit processing production lines for juice extraction and essential oil extraction. Its star product, YUZU Juice, was launched and quickly took the market by storm, selling strongly across East China.

2022：2022 年 7 月底、11 月底分别建成 2 条高速玻璃瓶热灌装生产线，投产后新增 15 亿产能，缓解双柚汁供不应求的局面。2022 年初双柚乳酸菌、香柚拉格啤酒、柚子酒、香柚个护等产品系列陆续上市。达成 4 亿元销售额。

2022: By the end of July and the end of November 2022, two high-speed glass-bottle hot-filling production lines were completed respectively. After they were put into operation, annual production capacity increased by 1.5 billion bottles, easing the supply shortage of YUZU Juice. At the beginning of 2022, product lines including YUZU Lactic Acid, YUZU Lager Beer, YUZU Wine, and YUZU personal care products were launched successively. Annual sales reached RMB 400 million.

2023：灌装第三车间于 2023 年 2 月底破土动工，已于 2023 年 12 月底建成投产，具备 4 条高速自动灌装生产线，年产值可达 45 亿元。入选农业农村部第一批农业高质量发展标准化示范基地。宋柚乳酸菌风味饮料被评为 2023 中国特色旅游商品大赛金奖。

2023: Ground was broken for the third filling workshop at the end of February 2023, and it was completed and put into operation by the end of December 2023. It is equipped with four high-speed automated filling lines and is capable of generating an annual output value of up to RMB 4.5 billion. The company was selected as one of the first batch of Standardized Demonstration Bases for High-Quality Agricultural Development by the Ministry of Agriculture and Rural Affairs. YUZU Lactic Acid won the Gold Award in the 2023 China Specialty Tourism Products Competition.

2024：开始全国营销布局，在广西百色、四川武胜、重庆酉阳，建设香柚种植、鲜果加工、饮料加工生产基地。2025 年销售目标 30 亿元。广西百色工厂一期 2 条生产线 12 月正式投产，年产能 20 亿元。

2024: The company began its nationwide market expansion by establishing YUZU planting, fresh fruit processing, and beverage production bases in Baise, Guangxi; Wusheng, Sichuan; and Youyang, Chongqing. The sales target for 2025 is RMB 3 billion. Phase I of the Baise, Guangxi factory, with two production lines, officially went into operation in December, with an annual production capacity worth RMB 2 billion.

2025：2025 年已进入北美、东南亚、澳洲、中东、中亚市场。计划用 3 年时间完成全球市场布局。5 月，四川武胜鲜果加工及饮料生产基地正式开工建设。一期工程将建成两条饮料生产线，预计 2026 年 6 月投产，年产值可达 20 亿元。同时，一条鲜果加工生产线也将在一期内建成，进一步提升鲜果加工能力，推动产业升级。

2025: In 2025, the company entered the markets of North America, Southeast Asia, Australia, the Middle East, and Central Asia. It plans to complete its global market layout within three years. In May, construction officially began on the fresh fruit processing and beverage production base in Wusheng, Sichuan. Phase I will include two beverage production lines, which are expected to be put into operation in June 2026, with an annual output value of up to RMB 2 billion. At the same time, one fresh fruit processing line will also be completed in Phase I, further enhancing fresh fruit

processing capacity and driving industrial upgrading.

我们的故事，从一颗“香柚(YUZU)”开始。

Our story begins with a single YUZU.

香柚(YUZU)介绍

Introduction to YUZU

香柚，国际名：YUZU;学名：香橙；日语名：ゆず;拉丁名：Citrusjunos Sieb.ex .Tanaka;是芸香科柑橘属，原产于中国长江中上游地区，兴盛于唐宋年间，在唐朝时传入日本。是一种高价值的经济作物。素有“东方柠檬”之美誉，但相比于柠檬，香柚使用功能更多、价值更高。其皮厚、凹凸不平、油胞多、芳香浓郁，但不宜鲜食，广泛应用于食品、饮料、美容护肤品领域。

YUZU, internationally known as YUZU, has the scientific name Citrusjunos Sieb. ex Tanaka and the Japanese name ゆず. It belongs to the genus Citrus of the Rutaceae family and originated in the middle and upper reaches of the Yangtze River in China. It flourished during the Tang and Song dynasties and was introduced to Japan during the Tang Dynasty. It is a high-value economic crop.Often referred to as the “Oriental Lemon”， YUZU offers more versatile applications and higher value compared with lemon. It has a thick, uneven peel, abundant oil glands, and a rich aroma. Although it is not suitable for fresh consumption, it is widely used in food, beverages, beauty, and skincare products.

果皮

PEEL

制作果酱、果茶等

Used to make jam, fruit tea, and other products

果汁

FRUIT JUICE

制作饮料、调味品、果酒等

Used to make beverages, seasonings, fruit wine, and other products

籽油

SEED OIL

具有美白抗氧化效果，制作美容护肤品

Known for its whitening and antioxidant benefits, and used in beauty and skincare products

果皮精油

PEEL ESSENTIAL OIL

各类食品饮料添加；美妆日化产品添加

Added to a wide range of foods and beverages, as well as beauty and personal care products

柚香谷出品的香柚(YUZU)系列产品

YUZU Series Products by YUZU Valley

# 第 4 页

香柚(YUZU)属全球稀缺性的柑橘类品种

YUZU is a globally scarce citrus variety.

香柚是不能鲜食的——果汁比醋还酸，广泛应用于各类食品、饮料、美妆日化产品

Not suitable for fresh consumption: Its juice is even more acidic than vinegar, but it is widely used

in various food, beverage, beauty, and personal care products.
培育期长：从育苗到开始结果，要经历 5~6 年的时间。
Long cultivation cycle: It takes about 5 to 6 years from seedling cultivation to the beginning of fruiting.
不易保存：香柚每年只在 11 月收获，无法在常温下长时间保存，通常只有 2 周时间。
Difficult to preserve: YUZU is harvested only once a year, in November, and cannot be stored at room temperature for long. Its usual shelf life is only about two weeks.
香气独特：适合用于高级料理、高档调味和制作饮品，使用的场景决定了高昂的身价。
Distinctive aroma: Its unique fragrance makes it ideal for premium cuisine, high-end seasonings, and beverage production. These usage scenarios also contribute to its high value.
种植面积：目前种植面积少，日本国内香柚种植面积约为 3.5 万亩，韩国曾经拥有 10 万亩种植面积，但由于 2018-2019 年的冻灾，产量锐减，柚香谷从 2015 年开始在国内种植，目前也仅有 4.5 万多亩。
Planting area: At present, the overall planting area remains limited. In Japan, the planting area of YUZU is about 35,000 mu. South Korea once had 100,000 mu under cultivation, but production dropped sharply due to frost disasters in 2018 and 2019. YUZU Valley began domestic cultivation in 2015 and currently has just over 45,000 mu planted.
气候地理：对于气候的适应性较差，不像其他柑橘类水果那样广泛分布。
Climate and geography: YUZU has relatively poor climate adaptability and is not as widely distributed as other citrus fruits.
